Education

Brock University St Catharines, ON
Bachelor of Science, Computer Science (Software Engineering) — Dean's Honor List *May 2021 – May 2025*

Experience

Software Developer I Jan. 2025 – Present
Pitama Foods *Toronto, ON*

- Led development of internal web tools for product catalog, inventory, and wholesale order workflows as single applications (SPA) using React, TypeScript, and Node.js, improving order-processing efficiency by 20% and reducing manual operational steps.
- Engineered RESTful APIs and optimized SQL queries to integrate product, pricing, and stock data as part of microservices-oriented architecture across internal systems, cutting manual data entry by 40% and improving inventory lookup times by 30% for sales teams.
- Partnered with cross-functional stakeholders to gather requirements, troubleshoot, and resolve software defects in internal applications, reducing recurring workflow-related support tickets by 25%.
- Applied Agile/Scrum practices and Git-based version control, participating in stand-ups and code reviews, helping decrease deployment issues by 15%.

Software Developer Intern May 2024 – Dec. 2024
E Planet Global *Remote*

- Developed and enhanced full-stack SPA features using React, TypeScript, Django, and .NET for internal and customer-facing applications serving 50,000+ daily users, improving task completion rates by an estimated 20%.
- Designed and implemented RESTful APIs with Node.js and SQL Server, reducing average API response times by 30% and increasing data throughput for core business workflows.
- Wrote and maintained unit and integration tests for data-driven features, contributing to a 35% reduction in regression bugs across two major releases.
- Optimized CI/CD pipelines using Docker, Azure App Service, and GitHub Actions, cutting deployment time by 30% and lowering release-related incidents by 40%.

Projects

AI Incident-Response Copilot | *Node.js, OpenTelemetry, Prometheus, Jaeger, Docker, Grafana, Anthropic Claude API*

- Built an LLM-powered agent correlating Prometheus metrics, Grafana, and Jaeger traces via a multi-platform adapter layer (Datadog, New Relic), reducing incident diagnosis time by up to 90%.

Car Dealership Platform | *React, Django, Express.js, Docker, OpenShift, MongoDB, CI/CD*

- Built a full-stack car dealership web app with advanced search and filtering across 100+ vehicle listings, improving data discoverability and overall usability for end users.

Skills

Languages: Java, C / C++ / C#, Python, JavaScript / TypeScript / JSX, SQL, Bash, PowerShell, Assembly
Web & APIs: Angular, React Native, Redux, Node.js, Django, REST APIs, SPA Architecture, HTML / CSS
AI/LLM Integration Anthropic Claude API, LLM Agents, Prompt Engineering, RAG concepts
Observability & Systems: OpenTelemetry, Jaeger, Grafana, Prometheus, Azure Monitor, Datadog, New Relic
Cloud & DevOps: Docker, Kubernetes, OpenShift, Azure App Service, GitHub Actions, CI/CD
Databases: SQL Server / Azure SQL, MySQL, PostgreSQL, MongoDB, Firebase

Certifications

IBM Full Stack Software Developer Professional Certificate
Coursera / IBM *Jul. 2025*
